SUMMARY

Software Engineer with **8+ years** building and shipping web applications, specializing in **Angular** and **TypeScript**. Currently at Techcombank, developing and deploying large-scale front-end applications with Docker and Nginx. Comfortable across the modern front-end stack — Angular, React, RxJS and Signals — with a focus on clean, maintainable UI code.

EXPERIENCE

- Software Engineer — Techcombank (TCB)**

2021 — Present

Full-time · Vietnam · [Angular 18-21](#) · [TypeScript](#) · [Nx](#) · [Nginx](#) · [Docker](#)

 - Develop core banking features for retail (individual) customers.
 - Build internal applications supporting bank tellers (over-the-counter service) and back-office operations.
 - Migrate the web application to Backbase LTS and upgrade Angular to newer versions.
 - Own code review and web deployment versions, contributing across the full SDLC.
 - Use AI-assisted tools in daily development and code review to boost productivity.
- Web Developer — NTQ Solution JSC**

2020 — 2021

Full-time · Vietnam · [Angular 8](#) · [PWA](#) · [TypeScript](#)

 - Developed a PWA e-commerce application with Angular 8 for a Singapore SME client.
 - Collaborated with a distributed team, working alongside developers based in India.
- Web Developer — CMC Global Company Limited**

2017 — 2020

Full-time · Vietnam · [ReactJS](#) · [Angular 6](#) · [TypeScript](#)

 - Joined as a Java fresher, then moved into front-end and built an internal project-management app with ReactJS.
 - Delivered an insurance platform for a French client using Angular 6 and TypeScript, in an offshore team.
 - Built a logistics application for a Singapore client.
- Civil Engineer — TRICC JSC**

2015 — 2017

Full-time · Vietnam

 - Civil engineering role before transitioning into software development in 2017.
